Practical - 2

Practical Title: Semantic HTML5 Pages with Accessibility-Ready Structure

Problem Definition:Develop static HTML5 skeletons for at least 10 StudentHub pages such as Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, FAQ, and Feedback. Use semantic tags and accessibility-friendly structure.

L. Theory

1. Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

Answer: Yes , I used tags such as nav ,header, main, section, footer properly .

2. Are form labels, headings, image alt text, and navigation links accessible?

Answer: Yes , all imgage, lables and navigation links are accessible by browser .
(using <a> and href =”link”);

3. Is the page structure consistent across all pages?

Answer: Yes , all pages have consistent structure . (title,header,body,footer)

M. Implementation/ Output/Result :

<!DOCTYPE html> Declares the document as HTML5.

<html> Root element of the HTML page.

<head> Contains page information like title and CSS links.

<meta> Defines character encoding and viewport settings.

<title> Sets the title shown in the browser tab.

<link> Links an external CSS file.

<header> Defines the page header section.

 Centers the content (deprecated tag).

<img> Displays an image/logo.

<h1> Main heading of the page.

<h2> Section heading.

<h3> Sub-heading.

<p> Defines a paragraph.

<b> Makes text bold.

<nav> Contains navigation links.

<a> Creates hyperlinks.

<marquee> Displays scrolling text (deprecated tag).

<body> Contains all visible page content.

<main> Represents the main content of the page.

<section> Groups related content into sections.

<article> Represents independent content or an article.

 Creates an unordered (bulleted) list.

 Defines a list item.

<hr> Inserts a horizontal line.

<footer> Defines the footer section.

P. Challenges Faced:

At the start of this practical, I don't know how to create this type of sections…then I searched for it in google…in W3school website I found solution for it..

At start I am confused how my navigation flow/link will work ,then I asked for it in Ai & got particular syntax for it…

Q. Learning Outcomes:

By this practical , I learned about basic HTML structure & make basic Website without any fancy CSS styles.
